A Message from JBL
and the Electronics Industry Association:

Selecting fine audio equipment, such as the unit you have just purchased, is only the start of your musical enjoyment. Now it is time to consider how you can maximize the fun and excitement your equipment offers. JBL and the Electronics Industry Association's Consumer Electronics Group want you to get the most out of your equipment by playing it at a safe level; one that lets the sound come through loud and clear without annoying blaring or distortion – and, most importantly, without affecting your sensitive hearing.

Sound can be deceiving. Over time your hearing "comfort level" adapts to higher volumes of sound. What sounds "normal" can actually be loud and harmful to your hearing. Guard against this by choosing a safe level BEFORE your hearing adapts.

TO ESTABLISH A SAFE LEVEL:

- Start your volume control at a low setting
- Slowly increase the sound until you can hear it comfortably, clearly, and without distortion

ONCE YOU HAVE ESTABLISHED A COMFORTABLE SOUND LEVEL:

- Do not exceed that level

Taking a moment to do this now will help to prevent hearing damage or loss in the future. After all, we want you listening for a lifetime.
