

THRILL Multi-FX LED

Hybrid effect light—rotating multibeam, laser, strobe

The value of hybrid

The THRILL Multi-FX LED presents a terrific value for money, combining three energizing effects into one fixture. Perfect for performers who want to outfit their show with high intensity, stunning lighting effects, but have limited space for mounting and transporting equipment.

Hundreds of laser beams

The THRILL Multi-FX LED has an impressive laser effect engine consisting of independently controlled red and green lasers. Hundreds of laser beams project simultaneously, washing over the crowd, exciting the eye.

Let the music do the talking

THRILL Multi-FX LED features a built-in microphone—simply turn on the sound trigger and let the beat of your music THRILL your audience. In addition, the fixture has eight, professionally-programmed shows that can be run either standalone or with daisy-chained units—no lighting experience required.

THRILL Multi-FX LED is a 3-in-1 LED light fixture that is guaranteed to make your show larger than life. Equipped with lasers, strobes, and rotating multibeam effects with sharp optics and super bright output, THRILL Multi-FX LED has an impressive number of tricks up its sleeve for a wide variety of dazzling looks.

KEY MESSAGES

MARTIN HERITAGE

For 30 years, the Martin brand has been the leading choice of professional lighting designers, rental and production houses, and installers across the global architectural, commercial, and entertainment lighting markets. With the THRILL series, Martin is bringing its industry-leading excellence in dynamic light and visual effects to new audiences by providing more affordable and easier-to-use models, while still retaining a die-hard dedication to quality and our customers.

PORTABLE AND LIGHTWEIGHT

Its portable and lightweight design makes the THRILL Multi-FX LED ideal for on-the-go entertainers and small venues working with limited stage footprints. It's also perfect for rental companies who want to supply lighting solutions for smaller setups that do not have the budget for professional lighting operators.

NO COMPLEX PROGRAMMING

The THRILL Multi-FX LED features several macros on each channel that you can use as a baseline in your programming. And when you need a break from controlling the lighting, easily put the fixture into the integrated show control mode via DMX, and let pre-programmed looks and a sound trigger do the work for you.
