

# HARMAN KARDON® HEADPHONES BT

Introducing the BTs, over-ear headphones that offer high-quality wireless music streaming from any *Bluetooth*®-equipped device. Blending acoustics and aesthetics, Harman Kardon BT headphones embody the essence of "Beautiful Sound," while providing the untethered freedom and convenience of wireless music enjoyment.

Beautiful sound. To go.

Harman Kardon BT headphones with *Bluetooth*® offer more than a musical escape. They let you escape from wires. They employ AAC and apt-X® coding for the highest quality wireless audio streaming and incorporate a built-in microphone and playback buttons on one of the ear-cups. It's the tangle-free, hassle-free way to enjoy your music. The USB-rechargeable BTs have a battery that lasts up to 12 hours. And unlike other *Bluetooth* headphones, even when the battery dies, BT headphones will still work when connected by the supplied bypass cable to a playback device. They also feature a closed-back design that keeps outside noise out and keeps your listening experience for your ears only. Lightweight and comfortable, BT headphones let you take Beautiful Sound with you wherever you go.

## Highlights

- Sophisticated, modern design
- Sonic clarity and accuracy even at low volume levels
- Wireless, high fidelity and telephony
- User-exchangeable metal bows and self-adjusting housings
- Passive playback mode
- USB-rechargeable
- Optimized driver system

# KEY FEATURES

## HARMAN KARDON® HEADPHONES BT

From high-quality materials to exceptional acoustic performance, these new headphones reflect the Harman Kardon commitment to innovative industrial design and uncompromising sound quality.

### Sophisticated, modern design

Harman Kardon BT headphones offer high-tech performance wrapped in an elegant package and interface. With their blend of sandblasted steel and black matte housings, the BTs' design and function complement Apple products while reinforcing the sophisticated elegance of the Harman Kardon brand.

### AAC and aptX wireless coding

BT headphones employ AAC (used by Apple) and aptX coding to ensure the best wireless audio performance possible from a *Bluetooth*-equipped device.

### Passive playback mode

Unlike other *Bluetooth*® headphones, BTs let you enjoy continuous playback even when the battery dies. Just connect them to the playback device using a supplied bypass cable. This makes BTs ideal for enjoying in-flight entertainment systems – another capability other *Bluetooth* headphones can't offer.

### Optimized driver system

High-performance 1-5/8-inch (40-millimeter) drivers produce an excellent frequency response (16Hz – 20kHz), wide dynamic range and high sound-pressure levels. As a result, BT headphones deliver accurate sound and extended bass response.

### Sonic clarity and accuracy even at low volume levels

The BTs' acoustic engineering and passive noise reduction mean that you can hear music and other audio content clearly at low volume levels, so you can enjoy all the music definition without all the volume – and that's safer for your ears.

### User-exchangeable metal bows and self-adjusting housings

BT headphones come with two headband bows (small and large) to optimize fit and improve acoustic performance. Rugged steel hinges enable the BTs' housings to swivel in two dimensions. This enhances comfort and maintains an ideal acoustic seal around the ear.

### Slow-retention premium foam

Premium foam in the ear pads contributes to the BT headphones' excellent passive noise reduction and extended bass response. The slow-retention foam helps maintain an acoustic seal around the ear, which keeps outside noises out and also keeps the listener's music from disturbing others.

### USB-rechargeable

BT users can charge the headphones on the go with a supplied USB cord, which eliminates the need for batteries or an extra charger.

### 2D folding mechanism and premium carrying case

The BT ear cups fold flat when they're not in use, making the headphones easier to transport and store. The flat-folding headphones and included carrying case slip easily into bags or briefcases – which makes the BTs especially convenient for travelers.
